WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

NO. 1. VOL. C3. WEEK ENDED SATURDAY, 1ST JANUARY, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 305 — 164 boys and 141 girls.

The number of deaths registered of persons normally residing in the principal towns was 204. Of these deaths, 27 were due to malignant neoplasms, 1 to tuberculosis and 1 to influenza. There was 1 death due to burns.

Among the deaths of infants under one year, one was due to pneumonia and one to accidental asphyxia.

The total number of births registered during the week in the principal towns was 685 — 351 boys and 334 girls, of which 152 boys and 129 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 311, of which 153 were registered in Dublin County Borough.

TABLE 1.—Births and Deaths registered during the week ended SATURDAY, 1st JANUARY, 1966, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

No. 8. VOL. C3. WEEK ENDED SATURDAY, 19TH FEBRUARY, 1966. PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 406 — 208 boys and 198 girls.

The number of deaths registered of persons normally residing in the principal towns was 165. Of these deaths, 20 were due to malignant neoplasms, 2 to tuberculosis and 2 to influenza. There was 1 transport accident.

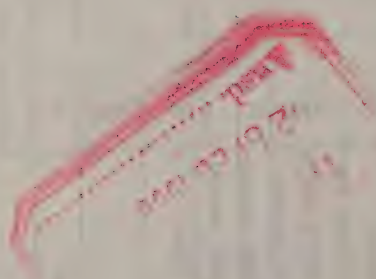

Among the deaths of infants under one year, 2 were due to pneumonia, 1 to congenital malformation and 1 to congenital heart disease.

The total number of births registered during the week in the principal towns was 790 — 406 boys and 384 girls, of which 200 boys and 200 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 248, of which 120 were registered in Dublin County Borough.

TABLE 2.—Deaths registered during the week ended SATURDAY, 19TH FEBRUARY, 1966, which were assigned to Dublin and Cork County Boroughs and twelve other towns, classified by Cause and Age Group.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

NO. 15. VOL. C3. WEEK ENDED SATURDAY, 9TH APRIL, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 336 — 171 boys and 165 girls.

The number of deaths registered of persons normally residing in the principal towns was 247. Of these deaths, 37 were due to malignant neoplasms, 4 to tuberculosis and 14 to influenza.

Among the deaths of infants under one year, 3 were due to pneumonia and 1 to congenital malformation.

The total number of births registered during the week in the principal towns was 618 — 312 boys and 306 girls, of which 151 boys and 153 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 366, of which 184 were registered in Dublin County Borough.

TABLE 1.—Births and Deaths registered during the week ended SATURDAY, 9TH APRIL, 1966, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

NO. 27. VOL. C3. WEEK ENDED SATURDAY, 2ND JULY, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relates to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 430 — 221 boys and 209 girls.

The number of deaths registered of persons normally residing in the principal towns was 128. Of these deaths, 26 were due to malignant neoplasms and 5 to tuberculosis.

Among the deaths of infants under one year, 3 were due to congenital malformation, 2 to pneumonia and one each to prematurity, atelectasis, enteritis and haemorrhagic disease of newborn.

The total number of births registered during the week in the principal towns was 825 — 431 boys and 394 girls, of which 246 boys and 202 girls were registered in Dublin County Borough.

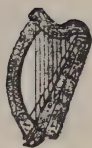

The total number of deaths registered in the principal towns was 209, of which 110 were registered in Dublin County Borough.

TABLE 1.—Births and Deaths registered during the week ended SATURDAY, 2ND JULY, 1966, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

No. 33. VOL. C3. WEEK ENDED SATURDAY, 13TH AUGUST, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relates to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 448 — 244 boys and 204 girls.

The number of deaths registered of persons normally residing in the principal towns was 194. Of these deaths, 42 were due to malignant neoplasms and 2 to tuberculosis.

Among the deaths of infants under one year, 4 were due to pneumonia, 2 to congenital malformation, 2 to birth injury, 2 to respiratory distress syndrome and 2 to atelectasis.

The total number of births registered during the week in the principal towns was 950 — 494 boys and 456 girls, of which 268 boys and 231 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 313, of which 188 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

NO. 37. VOL. C3. WEEK ENDED SATURDAY, 10TH SEPTEMBER, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relates to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 456 — 222 boys and 234 girls.

The number of deaths registered of persons normally residing in the principal towns was 137. Of these deaths, 25 were due to malignant neoplasms and 2 to tuberculosis. There were 3 drowning and 2 transport accidents.

Among the deaths of infants under one year, 2 were due to gastro-enteritis, 2 to pneumonia and 2 to congenital malformation.

The total number of births registered during the week in the principal towns was 937 — 461 boys and 476 girls, of which 223 boys and 229 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 229, of which 125 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN 1.

No. 47 VOL. C3. WEEK ENDED SATURDAY, 19th NOVEMBER, 1966. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relates to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 402 – 230 boys and 172 girls.

The number of deaths registered of persons normally residing in the principal towns was 182. Of these deaths 32 were due to malignant neoplasms, and 3 to tuberculosis. There were 3 transport accidents.

Among the deaths of infants under one year, 7 were due to congenital malformation, 3 to respiratory distress and 1 to broncho-pneumonia.

The total number of births registered during the week in the principal towns was 839 – 444 boys and 395 girls, of which 214 boys and 172 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 280 of which 153 were registered in Dublin County Borough.
